

MWOP Updated July 2024

The map displays the MountainWest Pipeline system in southern Utah. The main pipeline is shown as a solid black line, and the MountainWest Overthrust Pipeline is shown as a dashed black line. The system includes several delivery points and processing plants, each labeled with a box containing its ID and name. The legend identifies the symbols used for the pipelines, indicator lines, meter stations, compressor stations, major interconnect points, processing plants, and deactivated locations.

**LEGEND**

- WIC to Overthrust

Kern River Gas Transmission

- Painter
- Roberson
- Hams Fork

MountainWest Overthrust Pipeline (MWOP) is located in southwestern Wyoming. It provides transportation services for producers in the Green River, Overthrust, Wamsutter, and other Rockies producing basins with interconnects to several major pipeline systems including Ruby Pipeline, Rockies Express Pipeline, MountainWest Pipeline, Kern River Gas Transmission, and Wyoming Interstate Company. With its interconnections to multiple long-haul pipelines, MountainWest Overthrust Pipeline is designed to deliver clean natural gas to both eastern and western markets providing shippers with multiple market opportunities.

## MOUNTAINWEST OVERTHRUST PIPELINE RATES (per Dth)

FT	Monthly RDC	\$	1.505000
	Authorized Overrun Charge - Max	\$	0.05068
	Authorized Overrun Charge - Min	\$	0.00120
	Unauthorized Overrun Charge - Non-Critical	\$	0.00167
	Unauthorized Overrun Charge - Critical	\$	10.00000
IT	Daily Rate (Includes Usage) - Max	\$	0.05068
	Daily Rate (Includes Usage) - Min	\$	0.00120
